Power Mod Surge

The WSPD surge protection module is a new addition to the Siemens Power Mod multi-family metering product line. Surge protection can now be added as an integral module to the product line making for a safe and professional installation where surge protection is required. The Power Mod WSPD family features the following:

- A standalone enclosure connected to the 1200amp thru bus
- External, tamper proof, surge access
- 100 – 500kA ratings
- Optional breaker disconnect
- Power Mod QuickSystem features

The QuickSystem and 1200A bus features make installation easy saving you time and money. Add protection to your next multi family application by installing Siemens Surge Protection.

Siemens provides the broadest product portfolio related to multi-family applications. The Power Mod™ line of multi-family metering offers key labor savings and flexibility by using the QuickSystem™ features. Setting standards for product quality with robust design and new solutions, Siemens now offers new custom color options for Power Mod, eliminating dangerous over spray conditions. The new ES™ and PL™ load center series are providing more flexibility and innovative features. While the ES Series is designed for most basic applications the PL Series features robust design and labor saving features. High rise applications can utilize the riser load center which features higher ratings and more circuitries than most manufacturers. Known for its rich tradition and high quality products, Murray continues to meet our customer needs every day.

Our ground-breaking GenReady Load Center is the only load center to incorporate generator power transfer inside of the load center enclosure. Siemens helps to improve productivity with our industry leading arc-fault detection technology and features. Our patented LED indicators let installers and home owners know whether a tripping event is related to an overload or arcing condition.

Flexibility, innovation, and quality are the hallmarks of Siemens' products for multi-family applications providing the customer with un-matched value.
